As you may know, U.S. intelligence agencies have said that they believe the Russian government attempted to influence the outcome of the U.S. presidential election last year through hacking of political campaigns and the release of selected information.

Q26. How likely do you think it is that the intelligence agencies' assessment that Russia attempted to influence in the U.S. election is correct – extremely likely, very likely, somewhat likely, not too likely or not at all likely?

Q28. Which comes closer to your view of the investigation into contacts between Russians and Trump campaign associates – [ROTATED: an independent special prosecutor should be appointed to handle the investigation, (or) Congress is capable of handling the investigation itself]? (ASKED MARCH 2-4. RESULTS BASED ON 715 INTERVIEWS. SAMPLING ERROR: +/- 3.5 PERCENTAGE POINTS.)

	<u>March 1-4 2017</u>
Independent special prosecutor should be appointed	65%
Congress is capable of handling	32%
No opinion	3%

METHODOLOGY

A total of 1,025 adults were interviewed by telephone nationwide by live interviewers calling both landline and cell phones. Among the entire sample, 28% described themselves as Democrats, 25% described themselves as Republicans, and 47% described themselves as independents or members of another party.

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, and telephone usage.

Crosstabs on the following pages only include results for subgroups with enough unweighted cases to produce a sampling error of +/- 8.5 percentage points or less. Some subgroups represent too small a share of the national population to produce crosstabs with an acceptable sampling error. Interviews were conducted among these subgroups, but results for groups with a sampling error larger than +/-8.5 percentage points are not displayed and instead are denoted with "NA".
